

Simple Kitchen Peninsula

Build a new peninsula to open up your kitchen without sacrificing your work surface.

Construction notes:

- This project is designed as a stand-alone unit that can be secured to your existing cabinetry and topped with a 42 x 24-in. countertop.
- You'll need to adjust the leg height to match the height of your base cabinetry.
- For this particular peninsula, we used solid oak and joined the parts using dowels and glue.
- Refer to the cutting list and illustration on p. 2 to build the peninsula frame.

INSTALLATION

Clamp the peninsula frame to your existing base cabinets. Add shims under the legs to level the frame.

To secure the peninsula frame in place, drive screws through the cabinets and into the legs. Drive screws through the top cleats to attach the countertop.

SIMPLE KITCHEN PENINSULA

CUTTING LIST

KEY NO.	NO.	DESCRIPTION	DIMENSIONS
A	4	Legs	2 x 2 in. x existing cabinet height
B	2	Side rails	3/4 x 3 x 36 in.
C	2	Top end rails	3/4 x 3 x 16 in.
D	2	Bottom end rails	1-1/4 x 3 x 16 in.
E	2	Bottom stretcher	3/4 x 2-1/2 x 13-3/8 in.
F	2	Top cleats	3 x 18 in.
